Silk'n's Titan AllWays Wrinkle Reduction and Skin Tightening Device

This anti-aging tool reduces wrinkles and crow's feet, restores collagen and elastin fiber and lifts the facial contours without surgery—all while building volume, tightening skin and improving skin structure and elasticity. The result is younger-looking, glowing skin. Thanks to its wireless operation, you can use the Titan AllWays whenever and wherever you want to blur superficial sun and age spots. Silk'n utilizes Home Tightening technology, which combines three energy sources for more efficiency: bipolar radiofrequency energy, LED light energy and infrared heat energy. This combination ensures that the collagen and elastin fibers in the skin contract and are reconstructed, so it can repair itself from the inside out. In a blind, independent review, before and one month after 20

fortnightly sessions, the results reportedly showed that 96 percent of participants had visibly fewer wrinkles with no adverse side effects.
