

TECH FINDS AHEAD OF THE SPRING SEASON

BY MERILEE A. KERN, MBA

As springtime looms just around the corner, so too does the opportunity for fresh beginnings as the weather warms. With the season spurring sentiments of rejuvenation, now is a great time to spearhead a renewed effort to feel and look your best. To achieve this worthy goal, you'll want to spruce up your seasonal style. Add a fresh take on your new upcoming styles with fashion created with innovative technology, digital features and more!

Cove Headset from Cove

The Cove headset and companion IOS app are a great way to track your health and improve your body's regeneration through sleep and relaxation. Cove is a wearable technology that uses gentle vibrations to mimic human touch, providing feelings of calm so the body and mind function at the most efficient level. It activates our "seventh sense" of interoception (the perception of sensations from inside the body) that enables us to detect our body's internal needs and regulate them accordingly. Being in tune with your body helps improve your efficiency during the day, as well as relaxation at night. This results in better sleep, less stress and the ability to be more resilient and adaptable in life. Cove comes equipped with a best-in-class PPG heart rate sensor and a 3D accelerometer. Weighing only 20 grams, Cove sits comfortably behind your ears and uses dual-mode Bluetooth 4.2 to pair wirelessly with your phone. You can even complete four sessions without having to recharge your Cove. The device has an 85 mAh capacity and can be fully charged in 60-80 minutes.

Smart Swimming Goggle with Duo MP3 Player by Finis

Powered by Ciyi technology, the Finis' Smart Goggle was developed to help swimmers improve and meet their fitness goals. The in-goggle display and Smart Coach activity tracker gives real-time feedback to help track your distance, calories, stroke type and time. The fitness gear's comfortable, low-profile design also reduces drag and is leak-proof. Additionally, it is equipped with an adjustable

strap. Swimmers can choose from blue, white/smoke and blue mirror colors when ordering the Smart Goggle Kit, which includes the Smart Coach module, magnetic USB charging cable, six interchangeable nose bridges and a protective carrying case. Once you're out of the water, the app provides an in-depth analysis of your workouts, logs your history and allows you to connect with friends and fitness apps. Finis didn't forget about your ears. Its Duo MP3 player offers the highest quality sound without the use of earbuds. Its sleek, two-piece design and Bone Conduction audio transmission delivers crystal clear audio through the cheekbones to the inner ear. To use, swimmers only need to secure the integrated Duo clip to their goggle straps for a comfortable and streamlined fit. A simplified interface offers four buttons to easily navigate between music, podcasts, audiobooks and other supported audio files. Seven hours of battery life will keep you moving and grooving for the duration of your swim.

Blue Planet Watch by CIGA Design

An exquisitely designed watch, the Blue Planet watch from CIGA Design is centered around our collective home: planet Earth. Richly depicting crisp oceans, sprawling mountains and pristine land, the intricate design of this award-winning timepiece is complemented by a curved sapphire glass dome that reveals every detail on the dial. To fully appreciate the Series U Blue Planet mechanical watch, CIGA Design has notably transformed the conventional way of telling time. The compass rose featured on the watch's face acts as a pointer to the two orbiting rings to give a reading of the hour and minute. This simple, innovative way of telling time allows the wearer to fully appreciate the unique aesthetic and function of the Blue Planet watch. CIGA Design has collaborated with the Earth Day Organization (EDO) to launch a special edition gift box to put environmental protection into action. It combines the watch and EDO's "Protect Our Blue Earth"-themed pendant using environmentally friendly decoration. The watch features a "World Earth Day" limited-edition logo on the bottom cap that uses Earth-friendly screen printing, while the Blue Planet's case is made of more expensive and eco-conscious

recycled titanium material to help to reduce carbon pollution.

Activewear from Wolaco

Fitness lovers will surely love amping up their gym wardrobe with the Bowery Muscle Tank from Wolaco. Made with luxe micro-mesh, it boasts breathability to keep the wearer cool and comfortable during heated workouts. The company's North Moore Men's Compression Shorts are specifically designed with two of the world's only compressive sweat-proof pockets. These Wolaco compression shorts are made for running, hiking, lifting and even yoga. The shorts have two sweat-proof compression pockets that can fit all phone sizes for convenience, so the wearer can enjoy their favorite music or podcast while working out. The moderate compression of these shorts is perfect for all-day comfort and everyday performance, and includes a waistband made out of luxe nylon elastic. The fabric is also made out of 88% polyester and 12% spandex fabric content. It has a moisture-wicking fabric fiber and no chemical coatings to also ensure comfort and performance longevity.

"Fraser" Men's Sneaker from Woolloomooloo

Designed and knitted meticulously to bring effortless versatility to your feet, the Fraser sneaker from Woolloomooloo makes the perfect sock-less shoe. Woolloomooloo takes athleisure to a whole new level of comfort with its knitted Australian merino wool upper, wool-lined footbed and signature elastic lace system. The company is committed to spinning the finest wool product to create the world's premier wool sneakers—utilizing sustainable materials to build footwear that is better for your feet and the planet. Its choice of Merino wool works to insulate your skin from the cold environment through trapping heat within the structure, while amazingly transferring moisture away from the skin when temperatures start to rise. As a hygroscopic fiber, wool readily absorbs moisture (up to 35% of its own weight) to keep feet dry and prevent the build-up of sweat and bacteria. They come in seven shades, including green, sand, sand camo, blue multi, red multi, black multi and graphite.
