THE LUXE LIST: SUMMER SAVIORS

By Merilee Kern, The Luxe List Executive Editor

This summer, why not gear up with items that'll ease and enhance the season? Here are a few hot product picks to consider.

'SLOW WATCH' TIMEPIECES

Here's a cool timepiece to amp up those hot summer styles. A brand called "slow watch" boasts designs that will encourage you to slow down and enjoy life's moments. For example, the watch doesn't have a second hand, which is intended to inspire you to relax and not be rushed by the seconds ticking by, minute by minute and hour by hour. These watches also have a 24-hour dial to remind you that there is time to take a minute, or more, and enjoy the day – or certainly that moment. The watches are also great-looking. They come in three different styles with a clean aesthetic, and all of them feature Swiss GMT Quartz movement and 100-meter water resistance.

\$250-\$325, slow-watches.com.

OYOBX

Next is a great item to organize a quintessential summer staple – sunglasses! I have to admit that I have more pairs than I know what to do with, and keeping track of them all so I can match the right pair with my fashions or my mood can be a hassle. OYOBX solves that problem. It functions as a sleek and stylish home for glasses of any type, so you can readily see your options and choose which to wear – and keep them safe! This hand-crafted, super-durable product is engineered to protect your frames and lenses. It has features like a shatterproof glass top window, stainless steel ball hinges and a washable interior. The larger OYOBX houses up to 10 frames and can hold everything from oversized sunglasses to more minimal readers. There's also a mini version that holds up to six pairs of glasses.

\$135, oyobox.com.

SLAWSA

Because I'm a huge foodie, it was only a matter of time before my attention turned to something super tasty to eat, and I'll definitely have a new obsession this summer. It's a really unique product called Slawsa, and it's essentially a healthy, cabbage-based relish with deliciously addictive heat undertones. Besides the fact that it's incredibly flavorful and adds great texture and spice to a dish, it's also waistline-friendly! In fact, it's entirely fat-free, and 1 tablespoon has only 15 calories! The all-natural product is also cholesterol-free, gluten-free and kosher and has half the sodium and 20 percent more vitamin C than dill relish. It's ideal atop grilling fare like hot dogs, bratwurst, burgers, pulled pork, fish and even as a dip for tortilla chips ... or as that secret killer ingredient in countless recipes. Slawsa comes in four flavors, including Original, Spicy, Garlic and the new Habanero Fire.

\$3-\$3.99, slawsa.com.

MYPAINAWAY AFTER-BURN CREAM

Hello sun; bye-bye burns! Topricin's MyPainAway After-Burn Cream is a soothing combination of natural biomedicines that offers a safe, natural alternative to chemical-based lotions and ointments. Even one application soothes the skin and works to revitalize, restore, moisturize and even provide vibrancy. It heals UV-damaged cells in and under the skin, preventing blisters and scarring. It also helps to reduce existing scars through the enzyme action of the cream. The product actually treats the damage caused by UVR (ultra-violet radiation) and prevents DNA disruption to the skin cells. So it immediately starts healing the burn from inside the skin cell. And, in addition to sunburn, it's also great for windburn, blisters, cooking and other minor burns, and even chafing and itching.

\$19.99, topricin.com.

ADVANCED SKIN REPAIR WITH CERAMIDES

Here's a noteworthy product that'll help you bolster and maintain your skin health from the inside. Advanced Skin Repair with Ceramides will rehydrate, revitalize and help refresh dry, itchy skin from within! It's an innovative formula packed with ultra-pure ceramide oils to protect your skin from environmental damage and to lock in moisture, helping maintain healthy skin hydration and appearance. Life Extension's Advanced Skin Repair with Ceramides works internally to deliver an ingredient called Lipowheat, which is the only patented, clinically validated ceramide oil shown to deliver a dramatic skin improvement relative to both look and feel.

\$70, leskinrepair.com.
