Company Overview

Headquartered in Fresno, California, Slimtree, Inc. is a leading production company and Web TV channel dedicated to creating original, best-of-breed free access fitness and wellness programming available to consumers on-demand via the Internet, both from its own Web site located at www.slimtree.com and, as a MySpaceTV.com channel partner, from www.MySpace.com.

The company has uniquely married wellness, mobility and cutting-edge technology to deliver The Broadband Gym™ - a free online video-based exercise program designed for those who desire the convenience, privacy, cost-savings and flexibility to exercise, with expert instruction, at anytime 24/7/365, from anywhere in the world.

The Broadband Gym currently offers well over 100 free Web-based exercise videos providing expert instruction across a range of disciplines – Yoga, Pilates, aerobics, dance, martial art workouts, cardiovascular conditioning, and weight training – that are each available in 1, 5, 10 or 20 minute time increments. From Slimtree.com, users may also - at no cost - calculate their Body Mass Index (BMI), keep an exercise journal, log and track their weight-loss progress, upload photographs and pictures to personalize their experience, and access the company's robust learning center with fitness and diet articles, glossaries and a wealth of information regarding diet programs on the market today, among other tools.

In addition to its repository of free Web-based exercise programming featuring certified fitness instructors, Slimtree.com gives consumers Ultimate Exercise Mobility™ – the opportunity to download select fitness videos to their computer hard drive, cell phone, PDA or other device supporting the Windows® Media platform, eliminating the sometimes prohibitive need for a live Internet connection in order to view. For just \$1.49 per 10 or 20-minute program, consumers may download a wide array of fitness videos that may be viewed an unlimited number of times for 30-days, at which time they will auto-expire.

From Slimtree.com, consumers may also purchase one or all of its Yoga, Pilates and Cardio DVDs offering even greater exercise mobility, along with a variety of dietary supplement formulas.

A broadband video programming pioneer innovating the global eHealth space, Slimtree.com and The Broadband Gym are world-wide brands benefitting a multitude of users throughout the United States, Canada, United Kingdom, India, Australia, Japan, Singapore, Korea, and others.

Why Slimtree.com?

- **It's cost effective.** Membership is completely FREE of charge
- **It's comprehensive.** More than free 100 exercise videos are available along with a large repository of fitness and diet tools and resources
- **It's safe.** Videos feature only certified fitness instructors
- **It's all inclusive.** Exercise videos offered cover multiple fitness disciplines: Yoga, Pilates, aerobics, dance, martial art workouts, cardiovascular conditioning, and weight training
- **It's flexible.** Videos are available for use with or without live Internet connection
- **It offers Ultimate Exercise Mobility™.** Large selection of 10 and 20-minute videos may be downloaded onto computer hard drive, cell phone, PDA or other device supporting the Windows® Media platform for 30-day use
- **It's confidential.** Users are enabled to work out in privacy, with complete anonymity
- **It's convenient.** With on-demand access to video programming, users may exercise at any time of the day or night 24/7/365, from anywhere in the world
- **It's economical.** Eliminates need to purchase a gym membership, which is particularly useful for those in remote geographical areas, those prone to bad weather conditions, and those who generally want to save commute time and vehicle gas and mileage money
- **It's your schedule.** Users no longer have to plan their work out at a time and day that's good for a gym trainer or when a class is in session
