Gain the skills financial firms require with the Certificate in Quantitative Finance

There are throngs of varying types and sources of alternative data.

Unlike traditional models - those made available by financial exchanges and indexes, SEC filings, financial statements, corporate filings, analyst predictions, press releases, management presentations and other well-entrenched mainstream sources - today's breed of alternative data sets are being

garp.org/risk-intelligence/technology/7-unique-challenges-in-cryptocurrency-risk-management separate sources. Everything from financial transactions, satellites,
