Get in. Stand out.

Pierre Roberge, chairman of cyber defense firm ARC4DIA told Fox News that, while the absence of source code limits foreign government from immediately exploiting the leak, the dump will still cause problems down the road.

The vast trove of documents, he explained via email, is “a great guide for hackers,” offering plenty of detailed information on how to approach and solve hacking problems. “It is safe to say that it will certainly help increase the cybersecurity arsenals of foreign governments and criminals in the not-too-distant future,” he added. “If WikiLeaks or others were to release the source code, the impact would be major - enabling criminals and foreign government to quickly bootstrap [a] new hacking toolbox.”

“The leak has strengthened the ability of all potential hackers, this would include foreign entities,” added Rick Hanson, executive vice president of cybersecurity specialist Skyport Systems, in an email to Fox News. “The ability for the general
