If you don't want to spend your 'coin' on goods, the app also allows you to donate to charity

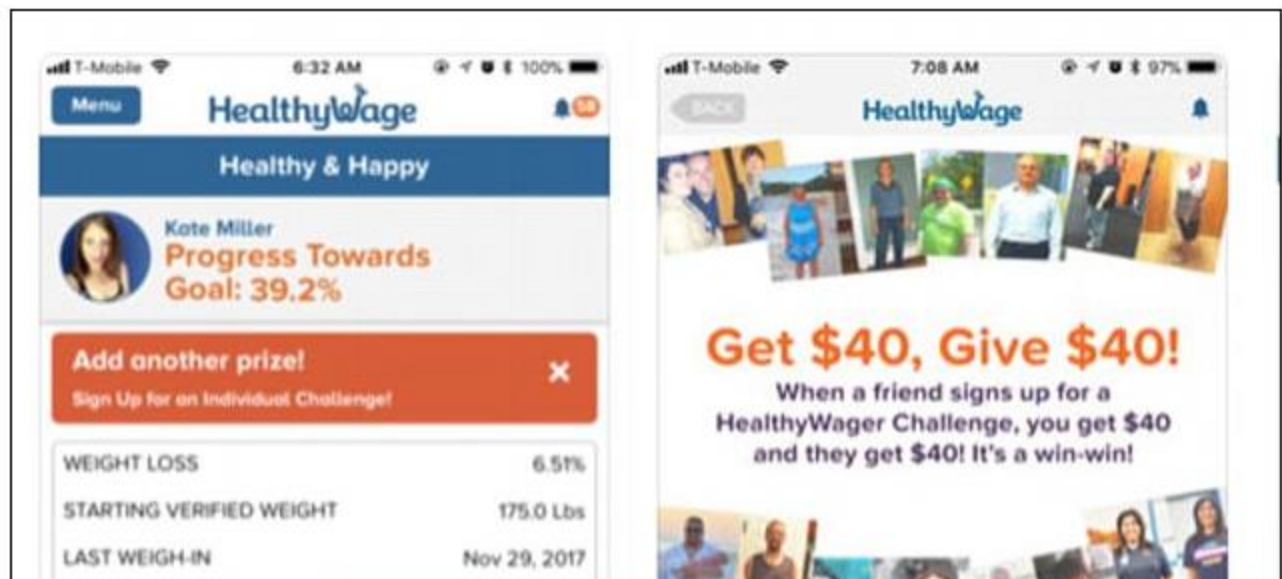

### HEALTHYWAGE

If losing weight is your goal, but you're struggling for motivation HealthyWage could be the app for you.

While the app is free, you will need to undergo a verified weigh-in first. After that you need to set a goal (it's time sensitive), and use your own money to bet against your success.

The idea is that you bet money to win for weight lost during a set time frame. If you reach your goals, you are paid out with money via money via PayPal or Amazon credit.

The app, available on iOS and Android, allows you to participate as an individual or as a team.
