ENERGY: CEOs Favor Several Market-Driven Approaches and Infrastructure Upgrades

One of the signature themes of President Donald Trump's candidacy was to support the domestic oil and gas industry.

By: Dale Buss March 3, 2017

One of the signature themes of President Donald Trump's candidacy was to support the domestic oil and gas industry in a variety of ways, from promising to give the go-ahead to stalled pipelines to denying that human activities have caused climate change.

The CEOs we spoke with saw some positives and negatives in how President Trump is addressing energy, with plenty of room for growth.

His denial of climate-change rankled some who felt that it boxed the new administration
