stockUI Explained

stockUI's inventory of world-class web site interfaces introduces a new concept in stock art/design sales that builds on the traditions and inherent benefits of other widely used stock assets such as photography, audio and video footage and typefaces. With stockUI, beginners, amateurs, seasoned designers and technical professionals alike can deploy high-end Web sites at just a *fraction* of the time and cost of designing a site interface system from scratch!

Users may browse stockUI online and select desired interfaces from our extensive collection of professionally produced designs that are suitable for any product, service, industry or organization. Once downloaded, each interface can then be completely customized and personalized by the user in terms of look and feel, navigation, usability and content.

With stockUI, no prior web site design experience is required to produce visually spectacular and highly usable Web site front-ends, which allows web design novices to get up to speed quickly – and with results that are *sure* to get attention. stockUI also gives professional, expert-level technicians, web site and graphic design agencies and freelancers a distinct competitive edge by expediting processes that will get their client's sites to market quickly – one with a high level of design excellence and reduced personnel, time and other related expenses - all resulting in increased profitability.

Let stockUI give you a HEAD START on the design of your Web site!

- » Expedite speed to market
- » Save time and money
- » Promote site stickiness
- » Increase user satisfaction
- » Maintain complete flexibility and control over end-result
- » Deploy sites with world-class design and usability
- » Position your self as a highly skilled Web site designer
- » Maximize return on web site investment!

stockUI Products

stockUI makes it easy to get all of the properly named, optimized and ready to code graphics needed for a highly usable participant experience. stockUI's "BASIC" graphical interface systems are available as layered, cross-platform ImageReady .psd (Adobe® PhotoShop®) files, and come with complete customization and output instructions. With stockUI, it's as easy as adding a logo, typing in navigation choices and clicking "save". The result is a complete set graphics for a professionally designed web site front-end. Add-on options for stockUI's BASIC product line include professionally coded, browser-tested HTML templates, icon systems, content templates and more.

All BASIC StockUI Interface Designs Are:

- **Produced by award-winning web site design and usability experts**
- **Available online from www.stockui.com for review, purchase and immediate download**
- **Provided as layered, cross-platform ImageReady (.psd) files**
- **100% customizable**
- **Cross-platform and cross-browser compliant**
- **"Size wise", each averaging ~~##~~ KB**
- **Ready-to-use, and come with complete product documentation including specifications and step-by-step customization and output instructions**
- **User-friendly, with technical support just a mouse click and/or a phone call away!**

For an even easier solution that includes graphics and browser-tested HTML code, stockUI's soon-to-be-released "TURNKEY" interface products will let users specify — through a simple web-based wizard — what navigation (menu) choices are needed and what colors and other front-end elements are desired. Each TURNKEY interface package is then built to order, with a completely functional "content-ready" site delivered within one business day – and often within hours. stockUI TURNKEY sites are cross-platform and cross-browser compliant, and increase speed-to-market with a site that provides users with unmatched "experience" design. TURNKEY options include W3C/ADA compliance, professionally designed HTML content templates, automated content deployment and much more.

About Us

stockUI is the brainchild of one of the country's foremost web usability & design houses, i-on interactive. Among other awards and honors received, in 2001 i-on was recognized for excellence in Internet design at the prestigious International Web Page Awards 2000 with two of the festival's thirty coveted "Best Of" awards, and two "Creative Excellence" awards, for designs in both the "Graphic Interfaces" and "Banner Campaigns" categories. Over the past seven years, i-on has developed award-winning interfaces and complete front and back-end web solutions that have delivered results to its cross-industry client base that includes Samsung, Siemens, Office Depot, Dermdex, Shopeasy.com, MedWerks.com, Boca Research, Global Village, the Bonita Bay Group, Tribune Interactive and many more.
